

## REACH

REACH is the new European Community Regulation on chemicals and their safe use – EC 1907/2006. The law was enforced on the 1st June 2007. It will be implemented step by step during the next 15 years.

In REACH terminology, Kvadrat A/S is an importer of articles without any release of chemicals. Therefore, we do not have to pre-register / register the chemicals used for production of our textiles.

We have a very close dialogue with our suppliers regarding REACH, to ensure that they fulfil their obligations in this law.

Our suppliers and their sub-suppliers have all confirmed that they have fulfilled their obligations according to REACH. They also have confirmed, that they have made the necessary pre-registrations for the chemicals requiring registration.
