Fabric

Our products reflect a commitment to colour and simplicity, along with the desire to develop textiles based on innovation and experimentation in design.

Our textiles have become integral to some of the world's most spectacular architecture and the most visionary furniture design being created today.

This positioning is a huge opportunity, yet at the same time a great responsibility; a responsibility that requires us to take an active role in modern design culture and to take part in shaping and creating its future.

Our fabrics are for you to innovate, to design, to create.
